SUPPLY CHAIN

I'm pursuing a master's degree at CUHK, building on my undergraduate studies in logistics management at Southeast University. Through route-planning research and business data analysis projects, I've developed analytical and problem-solving skills that I'm looking to apply in an entry-level supply chain role.

EDUCATION

The Chinese University of Hong Kong — 2026–Present
Master of Science in Systems Engineering and Engineering Management

Southeast University — 2022–2026
Bachelor of Management in Logistics Management
GPA: 3.57/4.0; ranked 6th
Recipient of national and university-level awards

Nanyang Technological University — 2024
Summer Exchange Program
Foundation of Information Analytics（A-）

SELECTED COURSEWORK

Operations Research 91
Optimization and decision models

Game Theory 97
Strategic decision-making

Management Information Systems 95
Digital business systems

Logistics Systems Modeling and Simulation 94
FlexSim and process optimization

Logistics Systems Planning and Design 92
Facility and network design

Business Intelligence and Data Mining 93
Data cleaning and clustering

SELECTED PROJECTS

Urban Drone Route Planning — 2025–2026
Project Lead | Provincial Undergraduate Innovation Project & Senior Thesis
- Led a four-person team to develop 100 route-planning scenarios from 10 urban map sections.
- Evaluated route options by distance, estimated energy use, and computation time.

Digital Technologies and Platforms in Logistics Service Ecosystems — 2023 - 2024
University-Level Undergraduate Research Program
- Reviewed research on platform ecosystems and supply chain transformation; contributed to an initial conceptual model.

LEADERSHIP & COMMUNITY SERVICE

Executive Board Member, Science and Technology Association — 2024 - 2025
- Managed recruitment, annual planning, and operations. Helped organize 20+ campus events serving 1,000+ students.

Three-Star Volunteer, Southeast University — 2022 - 2026
- Completed 237.9 verified volunteer hours in disability support, senior services, and hospital programs.
- Answered enrollment and campus life questions for more than 200 incoming students in Nanjing and led six home visits.

SKILLS & LANGUAGES

Excel	XLOOKUP, dynamic arrays, PivotTables, and Power Pivot; data preparation and interactive reporting.
SQL	SQLite; joins, subqueries, aggregation, and window functions for metric calculation and validation.
Power BI	Data modeling, DAX and interactive reports; delivery performance and supplier quality analysis projects.
Python	Modify existing Python scripts to support basic data preparation and analysis.
Simulation	Logistics process modeling, discrete-event simulation, and bottleneck analysis in FlexSim.
English	IELTS 6.5；CET-4 563；CET-6 489
